Project coordinator of an integrated care programme for older people (Kanton Basel Landschaft - Switzerland)
Per immediately or by appointment: 70%-100%

The research team of the INSPIRE project (https://inspire-bl.unibas.ch/) is looking for a project coordinator (70%-100%) for the project implementation in the implementation phase.

The project:
In view of the demographic development of the population in the canton of Basel Landschaft and the imminent shortage of family doctors and caregivers, the organisation of health care for older people in the canton has been redesigned in care regions where information and advice centres are being set up. These provide information on the topic(s) of old age and old age issues and enable advice, needs assessment and coordination of health and social services by a nurse and a social worker. The aim of the INSPIRE project is to develop, implement and evaluate an efficient, sustainable and integrated care programme for the older population using new methods of public health and implementation research.

Your tasks
Leading the implementation of the care model in close cooperation with the INSPIRE research team:
- Implementation of the INSPIRE care model in two care regions in BL (planning, implementation, communication)
- Coordinating and co-leading the cooperation with stakeholders
- Link between the INSPIRE research team and the local working groups in the different care regions
- Link to the research group and contact person for the staff of the information and advice centres in the two care regions
- Participation in the preparation of documents for data collection (e.g. questionnaires, declaration of consent, documentation of data collection) and other project-related documents
- Implementation and monitoring of data collection
- Planning and implementation of project-related dissemination activities
- Planning and management of the fortnightly project meetings
- Budget monitoring of the INSPIRE project

Your profile
- Experience in project management (including budget management)
- Distinct social competence and communication skills
- Experience in basic care for older people in Switzerland
- Familiarity with the Swiss healthcare system, with a focus on the development of new care models
- Master or PhD in a health discipline
- Research experience in a health discipline is an advantage
- Experience in stakeholder involvement is an advantage
- Very good expression in Swiss German/German, English skills (B2 level)

We offer
- A versatile and responsible job
- Participation in an innovative research project in an inter-professional international research team
- A salary based on the salary scale of the University of Basel

Application / Contact
Please apply with your curriculum vitae and a letter of motivation to Juliane Barnick by e-mail at bewerbung-nursing@unibas.ch. We look forward to receiving your application documents by 10 May 2020.
