Fundamental Concepts in Epidemiology

Facilitator

Prof. Albert Hofman
Harvard T.H. Chan School of Public Health

Prof. Oscar Franco
ISPM, University of Bern

Description

This course will provide an orientation to health and medical research from a quantitative and epidemiological viewpoint. It will give an introduction to the design of public health and clinical research, and it will discuss measures of disease frequency and association, and the validity of research in medicine. The course will discuss recent developments in epidemiologic methods for public health and clinical research. It will review the various study designs and major issues in the validity of epidemiologic studies. It will give an overview of elements of epidemiologic data-analysis.

Objectives

The purpose of this introductory class is to discuss the principles and methods of epidemiology for quantitative health research; to demonstrate their applicability in research in public health and clinical medicine; and to demonstrate the interrelations of public health and clinical research.

Dates

22 – 26 June 2020

Eligibility

Epidemiologists, clinicians interested in research, public health scientists with an interest in public health or clinical medicine or both.

Course Structure

The course includes both didactic interactive lectures as well as exercises and practicals. The exercises will provide the opportunity to discuss, in greater depth, the principles covered in the lectures.

Assessment

Daily quizzes and final test on last day
