

Post-doctoral position at the Department of Clinical Research 60-80%

start in winter 2020

The open position is within the “**DIALOGUE Study: Using digital health to improve care for families with predisposition to hereditary cancer.**” The study received funding from the Swiss National Science Foundation and is a bilateral collaboration with S. Korea. The specific aims are to develop a web-based platform to support communication about cancer predisposition among HBOC families; expand a research infrastructure developed in Switzerland for a family-based cohort to S. Korea; evaluate the efficacy of the web-based platform; and assess outcomes regarding the successful implementation of the platform in Switzerland and in S. Korea.

Your Tasks:

The successful applicant will work under the supervision of the Principal Investigator (Prof. Dr. Maria Katapodi) and collaborate with members of the CASCADE Consortium in Switzerland and the KOHBRA Consortium in S. Korea.

The objectives of the advertised post-doctoral position are to:

- Assist in the cultural and linguistic adaptation of an existing web-based platform for the Swiss context, assist in the development of the online platform
- Assume responsibility for recruitment of participants, narrative data collection, and data analyses, and dissemination of findings with manuscripts and conference presentations.
- Assist in efforts to obtain additional funding for the DIALOGUE Study.
- Support Prof. Dr. Katapodi in academic and management tasks.

Your profile:

- We are looking for a dynamic, reliable, responsible and motivated post-doctoral fellow with a PhD in medical anthropology, clinical research, nursing, psychology, or other health related sciences with strong evidence of scholarship.
- Strong **qualitative methodological skills** and good knowledge of common computer programs (e.g. Word) and qualitative analyses programs, such as N-Vivo etc.
- Proficiency in English and German/Swiss German (speaking and writing); proficiency in French and/or Italian (speaking and writing) is an asset.

- Ability to work independently in an interdisciplinary and international team, flexibility, and meet tight deadlines.
- Experience in oncology and/or cancer epidemiology and/or web-based platforms is advantageous.

We offer:

- The research will be carried out within a 4-year project that will start in November 2019. The successful candidate will have access to data from the DIALOGUE study and will determine the focus of his/her program of research under the auspices of Prof. Dr. Katapodi and with the collaboration of members of the CASCADE and KOHBRA Consortia
- Prof. Dr. Katapodi leads an innovation-driven team aiming to address healthcare needs of families affected by hereditary cancer syndromes within a multidisciplinary context.
- The Department of Clinical Research is a stimulating international working environment with opportunities for collaborative relationships with outstanding leading interdisciplinary teams.
- Training experiences are embedded in the educational and research infrastructure of the Faculty of Medicine, the Swiss School of Public Health (SSPH+), and the Inter-university Graduate Campus (IGC).
- Compensation according to the University of Basel guidelines for post-doctoral fellows.

Application/Contact

Please send your application (CV ; letter of motivation max 1,000 words ; statement of prior research experiences max 1,000 words ; three recommendation letters) to Prof. Dr. Maria C. Katapodi via email (maria.katapodi@unibas.ch) **by 10.12. 2019**. Candidates for the position will be notified for an in-person, phone, or Skype interview by 15.12.2019. The successful candidate is expected to assume his/her responsibilities by 20.01.2020 (negotiable).
