

SSPH+ FACULTY MEETING 2023: 20-21.06 (12:30- 12:30), Swiss TPH, Allschwil/Basel

SESSION G2: Fostering international success of postgraduate programs led by SSPH+ network partners 21.6.2023, 09:15-10:30

Format: 1 Parallel Session G2

Participants: open to interested program leaders and coordinators

G2: Moderator: Christoph Pimmer

Context:

SSPH+ network partners lead a range of postgraduate training offers (including seasonal schools) which target an international audience of students. In the absence of subsidies or fellowships, programs have difficulties in attracting students from abroad. The SDC funded SSPH+ Swiss Plexus grant includes a specific area (Area C) to reach out to influential Swiss constituencies such as embassies, SDC offices or chambers of commerce to strengthen their knowledge about the postgraduate training offers of the SSPH+ network partners. The ultimate objective is to win their support to become ambassadors of these training offers.

Objective:

The session offers an exchange and discussion platform among leaders / coordinators of such training offers

Participants:

Responsible leaders or coordinators of postgraduate trainings offered by SSPH+ partner institutions that are targeting global constituencies

Structure

After a short overview of the Swiss Plexus Area C objectives, interested partners may very briefly present the programs that might be interested in being featured in the international "swissness" networks. Enough time will be reserved to discuss how to best reach the goals.
