

**EBPH
2025**

5th European
SUMMER SCHOOL
EVIDENCE-BASED
PUBLIC HEALTH

21–25 JULY 2025
MUNICH

This Summer School is ideal for ...

researchers and professionals wishing to embrace and implement a complexity perspective in their public health activities,
researchers planning to undertake systematic reviews of public health interventions, involved in the development of public health guidelines or working on other aspects of evidence-based public health,
mid-career professionals working in public health institutions, and
students undertaking a PhD in Public Health, Epidemiology or related fields and wishing to embark on a career in evidence-based public health.

Join public health professionals, public health researchers, and decision-makers for a five-day intensive program on evidence-based public health.

Learn from leading experts in the field while networking with researchers and practitioners representing a variety of public health institutions across Europe.

Evidence-based public health (EBPH) is the development, implementation and evaluation of effective programmes and policies in public health through application of principles of scientific reasoning, including systematic uses of data and information systems.

The objectives of the Summer School are:

- Understand the principles of evidence-based public health and complex interventions.
- Be able to apply logic models in public health research and practice.
- Be able to critically read a systematic review.
- Know about and select appropriate evidence synthesis methods.
- Be able to evaluate systematic review protocols, inclusion criteria, and search strategies.
- Be able to undertake screening of articles against defined inclusion criteria.
- Know about meta-analysis and other synthesis methods.
- Understand Risk of Bias (RoB) tools and the GRADE approach in systematic reviews.
- Know about the current role of AI tools in enhancing systematic reviews.
- Know about critical steps in public health guideline development.
- Be familiar with the role of evidence-to-decision frameworks and be able to apply selected criteria.
- Be able to identify and apply selected knowledge translation (KT) strategies.
- Understand the importance of stakeholder engagement in knowledge production and translation.

The Summer School includes:

- Interactive lectures from experts in the field of evidence-based public health.
- Practice sessions and small-group exercises related to logic models, formulating questions, selecting the right review types, screening, interpretation of meta-analyses, evidence-to-decision frameworks and knowledge translation.
- Policy and practice insights covering a variety of public health topics delivered by eminent experts.
- Social activities including a guided Public Health walk through Munich and a summer school dinner.

Registration:

Registration is open from 15th January 2025. Please register on our website bit.ly/ebph2025

Cost

Early bird registration: 750 €

Normal registration: 950 €

Registration dates

By 30th April 2025: Early-bird booking ends (registration received)

By 3rd July 2025: Late-booking ends (last date for payments)

The fees include the summer school academic programme as well as participation in the Munich Public Health Walk and the summer school dinner. Please note that accommodation is not included in the Summer School fees.
